The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continuation Sheet (PTOL-303)

Application No.

Continuation of 3. NOTE: Claim 44 has been amended after final rejection to recite a density less than 0.01 g/cc. The added limitation changes the scope of the claims, and therefore requires further consideration. As stated in the Advisory Action mailed 4/26/06, Chmielewski does not give the claimed density value, however the applicant fails to disclose that a density specifically less than 0.01 g/cc is such a critical value or gives unexpected results so to exclude a density higher than 0.01 g/cc. The affidavit filed 4/7/06 discuses the criticality of a low density, but does not provide criticality for the claimed range. The research worksheet as presented on 5/10/06 does not provide criticality for the claimed range. Additionally, applicant's arguments are based on amended claims that will not be entered, therefore the arguments are not persuasive.
